

# Hand Held Metal Detector

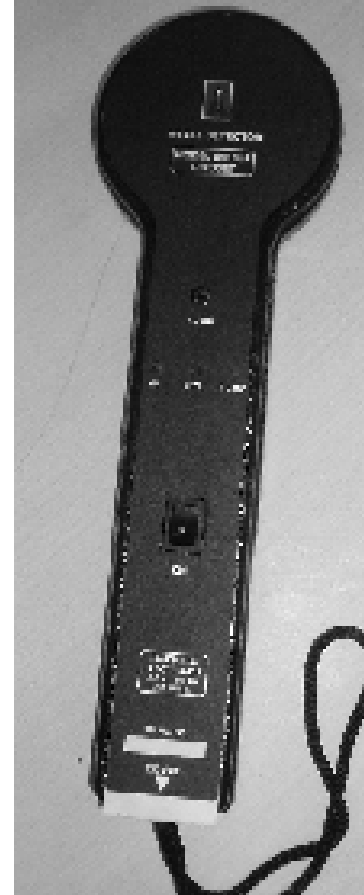

## Model SM-7CM / SM-7C

---

Sivananda Electronics is the leading manufacturer of metal detectors for security and pilferage application Including airports, courtrooms, custom, bank, jeweler units, defense establishments, malls, and other public places. SM-10CM is light weight and highly reliable hand held type of Metal Detector to detect hidden metal objects SM-10CM is ultra sensitive metal detector which can detect 0.1 gram of metal object.

### Features:

- Auto Set , does not require adjustment
- Detects weapons, ferrous & non-ferrous metals, conductive metal alloys & ferrite
- Light Weight
- Audio & Visual alarm on metal detection.
- Power ON, Metal detection and battery Charging indication
- Operates on single 9 Volt battery
- Built-in battery Charger
- High impact ABS light weight body with removable cover for replacement of battery
- Ultra low power consumption
- Easy to use. One switch operation
- Long battery life
- Comfortable handle and Wrist strap for holding

### Specification:

Sensitivity: 0.1 gram of metal from 20-25 mm distance

Dimension: 335X100 MM

Weight: 300 grams

Battery: 1 X 9 Volt re-chargeable/Dry /Alkaline battery

Temperature: 0 to 50 degree C

Humidity: 90% Rh
